RTI International has worked with CDC since our founding in 1958. Our long-term, collaborative relationship has included such seminal health-related projects as the Agent Orange Study, the National Household Seroprevalence Survey, and the post-9/11 World Trade Center Registry. Viewing CDC as our partner is natural, as our interests and missions run parallel. CDC’s mission is to promote health and quality of life by preventing and controlling disease, injury, and disability. RTI’s mission is to improve the human condition by turning knowledge into practice.

How do RTI and CDC work together?
RTI, a university-affiliated nonprofit contract research organization, holds several task order contracts with CDC. In addition, we are preapproved to work under several General Services Administration (GSA) schedules. This guide describes these contractual mechanisms and how to access them.
