

# Experience in India

Since 1982, RTI International has supported improvements in health, water and sanitation, energy and the environment for clients in India including the World Bank, the U.S. Agency for International Development (USAID), the U.S. National Institute of Child Health & Human Development (NICHD), the Bill and Melinda Gates Foundation, and other U.S. and international agencies and organizations. RTI's projects and programs in India emphasize institutional development through the transfer of analytical tools and methods, the dissemination of best practices, and collaborative applied research to test and apply new technologies. In 2008, RTI opened a permanent international office in New Delhi to better serve its clients and increase linkages with local partners and organizations.

Integration of Multi-Level Behavioral Biological and Economic Informatics for HIV Research, NICHD (2008–2012)

Global Network for Women and Children's Health: Prevention of Postpartum Hemorrhage and Prevention of Infection in Neonates, NICHD (2001–2012)
