

RTI in Asia

RTI International has been working in Asia for more than 40 years, providing technical assistance, institutional strengthening, and program support on behalf of governments, foundations, and private-sector clients.

We maintain four offices in the region—our Asia Regional Office in Jakarta, Indonesia; an office in Beijing, China; an office in Kuala Lumpur, Malaysia; and a wholly owned subsidiary, RTI International India, in New Delhi. This regional presence enables us to ensure quality project management, respond rapidly to client demands, build and maintain local partnerships, and identify public-private partnerships for sustainable development.

Together with our local partners, we deliver science-based solutions and advisory and technical services to help countries across South and Southeast Asia achieve national, regional, and local goals—in health, education, economic growth, energy, governance and public policy, and environmental management.

Core Capabilities

- Economic development
- Education
- Energy
- Environmental management
- Governance
- Health
- Information and communication technology
- Knowledge sector development
- Monitoring and evaluation
- Public private partnerships
- * Water resources management
- Water, sanitation, and hygiene (WASH)
