Dear Bidders,

Regarding the **Expression of Interest for Forest Carbon Project Investment Readiness Development in Kidepo Valley Landscape**, below are the questions/inquires received and our responses:

1. Could you please provide us with the indicative budget for the assignment?

   The assignment budget depends on your proposed approach/length of assignment so please indicate what you believe is realistic.

2. What is the total number of man-days required for this assignment?

   This again can vary and depends on the proposed approach, and also on how fast the proposed results will take to deliver. So if some work takes longer, there will be more days. We estimate that the entire project can take 6-12 months with different team members deployed as needed at different levels of engagement.

3. Is travel required for the assignment or can we undertake the assignment remotely?

   The nature of the assignment requires some presence in Uganda and in the project area, as it would involve working with communities and stakeholders. Hence the assignment cannot be undertaken fully remotely, though some tasks can be.

4. Is there any requirement for a local expert? We are an international firm.

   There is no specific requirement for a local expert although we believe having a local team member would be valuable for successful completion.
