

# The Promise of Science

RTI International is an independent, nonprofit research institute dedicated to **improving the human condition**. Clients rely on us to answer questions that demand an **objective** and **multidisciplinary approach**—one that integrates expertise across the social and laboratory sciences, engineering, and international development. We believe in the promise of science, and we are inspired every day to deliver on that promise for the good of people, communities, and businesses around the world.

## Making a Positive Impact

Decision-makers around the world face tremendous challenges. We deliver reliable data, thorough analysis, innovative methods, novel technologies, and sustainable programs that make a meaningful difference for our clients and for the communities and people they serve.

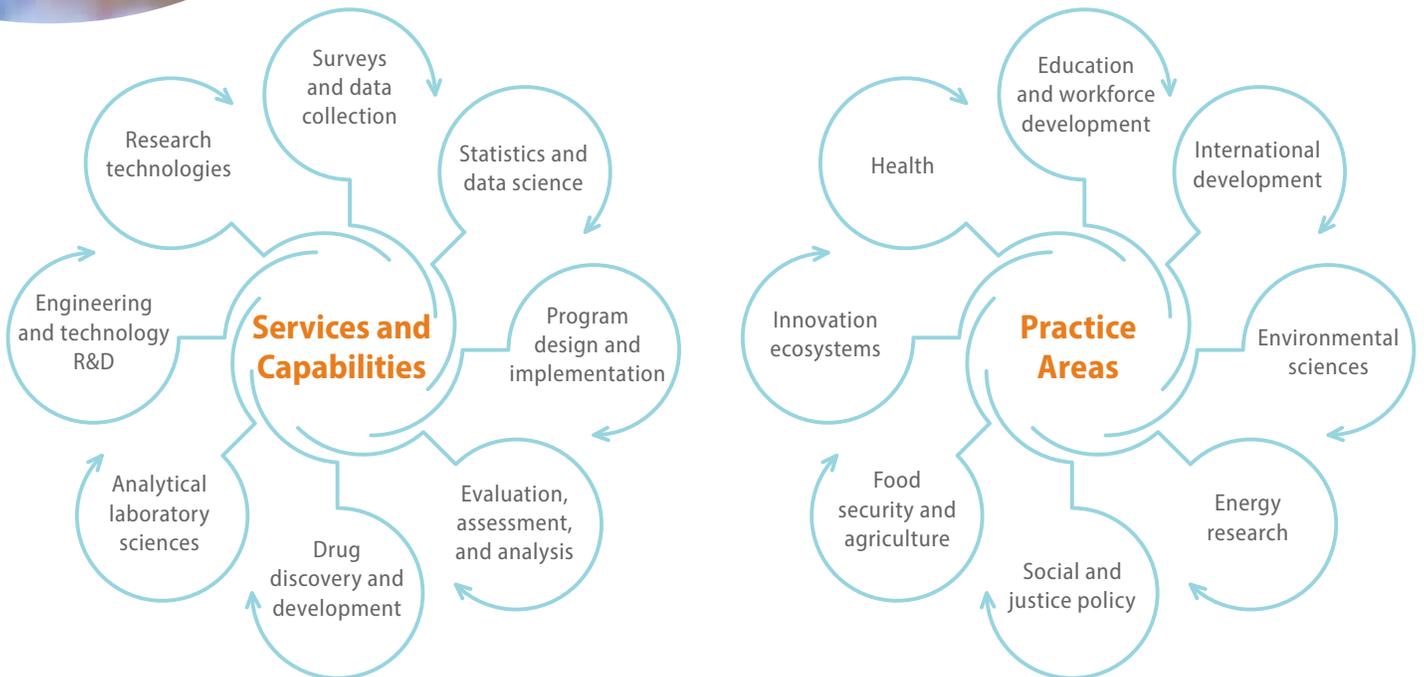

Each project is an opportunity to drive positive change through new information, best practices, improved methods, and an integrated approach. Whatever our projects demand and wherever they take us, we bring a deep commitment to exceeding our clients' expectations and a strong sense of mission shared.

## Our Expertise

With experienced thought leaders, state-of-the-art facilities, and proven approaches, we apply a **diverse** set of **services and capabilities** across **key practice areas** that intersect with the needs of our clients.

# Living Our Mission

As an institute and as individuals, we are committed to giving back to the communities in which we work, live, and play. Our Community Partnerships Program contributes to employee-nominated charities in communities served by our regional offices.

Since 1958, RTI has provided **superior quality research** and **technical services**. Our founders were members of the academic, business, and government sectors in what is now known as the Research Triangle region in North Carolina.

Today, we work closely with some of the world's leading research universities, engage in **trailblazing initiatives** with multilateral donors and foundations, serve as **trusted partners** to government agencies around the world, and provide **evidence-based** insight to a variety of commercial entities.

**Collaborating** with these partners, we are addressing **emerging issues** such as the Zika virus, noncommunicable diseases, opioid use, policing, data for development, the use of drones for research purposes, and the impacts of marijuana and e-cigarettes.

## The RTI Difference

What makes RTI special—and an employer of choice—is our focus on four key areas: our mission, our people, our culture, and our growth.

As individuals and as an organization, we constantly strive to make a difference in the world while upholding strong values and ethics. **Our culture reinforces our mission.** We recognize and respect the unique backgrounds, skills, and perspectives of all employees. And we foster inclusion across our organization to promote diversity of thought and innovative solutions.

We are committed to the advancement of science and society and to developing our employees. We believe in **investing in our people** through initiatives such as dynamic professional development, employee wellness, and world-class benefits.

Our **growth is driven by thought leadership**, which is supported through employee innovation competitions, internship showcases, and other programs that seed and nurture the ideas of our staff members. We also foster academic collaboration with research universities through our University Scholars Program. Finally, we develop scientific and technical leaders through the RTI Fellow Program, RTI Press, and other programs that fund and support investigator-led research and peer-reviewed publication.

## Offices

RTI maintains offices in key locations around the world.

### **U.S. Offices**

Research Triangle Park, NC (Headquarters)  
Ann Arbor, MI  
Atlanta, GA  
Berkeley, CA
