## Statement of Work

### Description of Activity/Service:

Energy Secure Philippines (ESP) is a US Government-funded multi-year program that aims to assist the Government of the Philippines (GPH) in promoting a more competitive power sector through investment mobilization, deployment of modern energy technologies, and support in policy reforms and regulation. Implemented by RTI International, ESP’s overall goal is to enhance energy security and reliability in the Philippines. It focuses on advancing inclusive economic growth and resilient development through increased private investment, promoting advanced technology deployment, and boosting the energy sector’s resiliency.

ESP supports the Philippine Department of Energy’s (DOE) initiative to integrate nuclear energy in its clean energy infrastructure. This is aligned with the national goals of achieving an optimal energy mix leading to energy resilience and reduced vulnerabilities from external disruptions. DOE issued Department Circular No. DC2025-10-0019, establishing the Policy Framework for the Integration of Nuclear Energy in the Country’s Generation Mix for 2023–2050 (Circular). The Circular assigns key responsibilities to the Energy Regulatory Commission (ERC), including interconnection standards applicable to Pioneer and succeeding Nuclear Power Plants (NPPs).

The ERC is called to enforce the Philippine Grid Code (PGC 2016) and the Open Access Transmission Service (OATS) Rules, both of which govern technical, safety, operational, and interconnection requirements for generating facilities. With the planned entry of NPPs into the Philippine power system, ERC must determine whether the existing grid interconnection standards are fully applicable to nuclear technologies or require amendments to address nuclear-specific operational and safety characteristics.

This TOR outlines the technical assistance required to support ERC in fulfilling this mandate.

### Product or Service Expectations (both if applicable):

#### Objectives

1. Determine the applicability of existing interconnection and technical standards to NPPs.
2. Identify gaps or insufficient provisions within the PGC and OATS Rules relative to nuclear technologies.
3. Develop recommended nuclear-specific amendments or supplemental provisions.
4. Provide technical and capacity-building support to ERC.

#### Scope of Work

The Service Provider shall support ERC through the following components:

1. Review the relevant provisions of the PGC 2016 (including GCR 4.2–4.7 and large

- generating plant requirements) and OATS Rules 2022 (Module B).
2. Evaluate NPP grid interface requirements, including stability behavior, fault-ride-through, protection coordination, SCADA/telemetry, power quality, and response to loss of offsite power.
3. Conduct gap analysis and benchmarking against international standards (e.g., IAEA, EPRI, IEC/IEEE, OECD/NEA, and nuclear-operating countries).
4. Recommend nuclear-specific enhancements to the PGC and OATS or new annexes as needed.
5. Draft ERC regulatory issuances, including amendments or revisions to the PGC and OATS Rules.
6. Deliver capacity-building workshops on nuclear grid integration and interconnection requirements.

#### Deliverables, Timelines, Special Terms and Conditions:

##### Deliverables

1. Inception Report
2. Standards Review and Gap Analysis Report
3. Proposed Nuclear Interconnection Standards
4. Draft Amendments to the PGC 2016 and OATS Rules 2022
5. Draft ERC Resolutions
6. Training Modules and Documentation
7. Final Integrated Report

##### Qualifications of the Service Provider

The Consultant must demonstrate expertise in grid codes, interconnection standards, and power system studies. Nuclear engineering or nuclear regulatory experience is preferred.

##### Confidentiality

All data, analyses, models, and reports produced are the exclusive property of the DOE and ERC.

Offerors shall submit proposals that include the following:

##### Cost Proposal

- Fixed-price cost proposal with assumptions.
- Milestone-based pricing.
- Any proposed travel or equipment-related costs.
- Clear separation of professional services costs and any optional equipment or tooling costs.

##### Required Administrative Documents

- Proof of legal registration.
- List of previous clients and relevant assignments.
- Signed RFP document. (page 4 and 9)

- Completed pricing table.

*ESP reserves the right to award to several bidders and fund any or none of the applications submitted, subject to the availability of funds.*
