

Ensure Healthy, High-Performing Service Members

Research-based solutions to address Department of Defense (DoD) challenges and increase overall force health, readiness, and performance

Military readiness depends on the collective health and wellness of Active Duty, Guard, and Reserve personnel. Teams need high-quality, precise information for data-based decision-making and innovative solutions regarding force health and wellness.

As a partner to agency leaders, RTI International bridges the divide between science and practice, allowing us to initiate and deliver solutions quickly by using thorough procedures, efficient scientific methods, and a proven understanding of the military culture and unique challenges that Service members face.

With over 40 years of experience in military research, RTI has led consortiums and partnered with organizations, including small businesses, that address issues regarding education; environmental remediation; and force health, readiness, and protection.

Services

*Science, technology, engineering, and mathematics
^Posttraumatic stress disorder

Enhance the health and readiness of Service members in garrison, in training, and during operations by leveraging our services and capabilities for delivering evidence-based products and solutions.

Prevention and intervention studies, comprehensive program evaluations and analysis, and field trials can address the complex questions and problems you face related to program and policy development and administration for military populations.

Expertise

RTI's application of research and technology includes evaluation, analysis, and recommendations for improved health systems; usability testing of manpower and personnel systems aboard ships; distance learning for emergency medical care; virtual reality for forensic training and assessment; and programs to address behavioral health issues, sexual assault prevention, substance use and abuse, and suicide prevention.

Experience

To improve the human condition, we collaborate with DoD and other funding organizations, including the following:

- Defense Health Agency
- U.S. Army Medical Research and Development Command
- Walter Reed Army Institute of Research
- U.S. Army Training and Doctrine Command
- Defense HIV/AIDS Protection Program
- Navy Personnel Research, Studies, and Technology
- Naval Health Research Center
