

Advertising Policies

RTI Press does not accept advertisements for its online or print publications.

Archiving

RTI Press archives its works in several locations. Briefs and reports are deposited to [Portico](#). All RTI Press open-access books are deposited into the [Carolina Digital Repository](#). Some works may also be archived in subject-matter repositories such as the [National Library of Medicine](#) (health sciences) and [ERIC](#) (education).

Authorship

RTI Press follows the ICMJE recommendations for authorship. For details, see the [RTI Press](#) website.

Ethics

The RTI Press follows RTI International's policies for [Ethics and Human Research Protection](#), including policies on:

- Conflicts of interest
- Scientific integrity and research misconduct
- Human subjects research
- Use of animals in research

These are covered in [RTI's Code of Conduct](#). At the time of submission to RTI Press, authors confirm their compliance with these policies in the preparation of each manuscript.

Copyright

RTI Press (i.e., RTI International) copyrights all its publications. RTI authors are responsible for obtaining client approvals for publications and for RTI Press to assert copyright over those publications.

Reprinting materials copyrighted by other publishers may be done with the appropriate permissions; authors are responsible for obtaining the relevant permissions.

RTI Press obtains Library of Congress and ISBN numbers for major publications (e.g., books or monographs). For other

publication categories (Research Reports, Methods Reports, Research Briefs, Policy Briefs, and Conference Proceedings), RTI Press obtains Library of Congress and ISSN numbers. In addition, the RTI Press assigns a digital object identifier (DOI) number for each publication.

Copublishing Agreements

RTI Press engages in copublishing agreements to extend the reach of RTI Press publications. For more information, contact RTI Press at rtipress@rti.org.

Errata

If substantive changes need to be made to a published document (i.e., not mere spelling corrections but factual data), we remove the document that has the errors from the RTI Press website. We make the necessary corrections and place a correction note just after the publication number on the copyright page. We describe what was changed, indicating the new material, not mentioning the old/incorrect material that was fixed. For example:

RTI Press publication MR-0014-1003.

This report corrects the following two errors found in MR-0014-1002: (1) for Table 2, "sickle cell anemia" was added to the Condition cell in rows 1 and 3; (2) the correct reference information is provided for reference number 27, Campbell and Ross, 2005.

RTI Press uses [CrossMark](#) to track any substantial changes to each manuscript. For more information, please see our [CrossMark policy statement](#).

Open Access

All RTI Press publications, with the exception of copublished volumes, are available as free, downloadable PDF files from the RTI Press. Books can also be purchased as bound volumes. The full open access policy statement can be found [here](#).

References

Except for Research Briefs and Policy Briefs, which always use ICMJE reference style, RTI Press gives authors the choice of whether to use either ICMJE or APA reference style. The overriding concern is that references be complete and
(continued)

Editorial Policies

presented consistently. For more details, see the references section of the RTI Press Style Guide.

RTI Press follows the [ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals](#).
