

# PAYMENT SYSTEMS AND ACOS

Accountable Care Organizations (ACOs) offer the potential to reduce duplicative health care services, streamline operations, and cut health care spending—particularly for Medicaid patients. But many states are not yet capable of implementing ACO models.

Despite their vast potential, ACOs come with many challenges—including establishing the appropriate model and structure, attributing beneficiaries, and determining risk levels and cost savings. And many states and state health officials are not currently equipped to make those decisions or determinations.

RTI International's team of health economists and health care payment experts can help make the decision process easier.

**Our team can assist you with implementing, expanding, and evaluating ACOs; we have done extensive work on the following:**

- Physician Group Practice (PGP) demonstrations
- Medicare Shared Savings Program
- Comprehensive Primary Care Plus (CPC+)

Determine the appropriate ACO structures and programs for your needs

Establish benchmarks and policies

Implement and evaluate your programs to ensure efficiency and cost effectiveness

Let us  
help you

Contact **Maggie Cole-Beebe**, Senior Manager, Economics, at [mbeebe@rti.org](mailto:mbeebe@rti.org) or **781.434.1728** to learn more about ways to partner with us.

RTI International is an independent, nonprofit research institute dedicated to improving the human condition. Clients rely on us to answer questions that demand an objective and multidisciplinary approach—one that integrates expertise across the social and laboratory sciences, engineering, and international development. We believe in the promise of science, and we are inspired every day to deliver on that promise for the good of people, communities, and businesses around the world. For more information, visit [www.rti.org](http://www.rti.org).
